Software engineer with 2+ years of experience in developing and maintaining web applications. Proven ability to work independently and as part of a team to deliver high-quality software on time. Seeking to contribute to an innovative company building cutting-edge interactive products.

## PROFESSIONAL EXPERIENCE

### Tricog Health

Software Engineer

Jan 2024 to Present

Associate Software Engineer

March 2022 to Jan 2024

- Drove ongoing improvements and introduced new features in the Admin Panel to **enhance customer acquisition**, optimize ECG case flows, enable case cloning, and streamline prepaid billing and device management processes.
- Contributed to the enhancement and implementation of new features for the Client-facing application, providing crucial server support for Android and iOS devices to ensure a seamless and responsive customer experience.
- Led the development of a **microservice** for creating PDF reports and templates using HTML and CSS, facilitating easy generation of customized PDF reports in any integrated project, streamlining reporting processes.
- Played a pivotal role in adapting the product to meet **HIPAA** compliance standards, ensuring data privacy and security requirements were met, enhancing the product's market positioning.
- Implemented **Webhook integrations** tailored for specific customers, facilitating seamless data sharing with their **Health Information Systems (HIS)** for enhanced communication and information exchange.
- Spearheaded **real-time integration** with Magnaquest, streamlining processes and significantly reducing operational costs and manual efforts for product management.
- Upgraded servers **Node.js** versions from 8 to 18, ensuring compatibility with existing codebases and dependencies.
- Developed and implemented **automation scripts**, significantly reducing manual effort for the business and customer management teams, which led to increased efficiency and accuracy.
- Actively participated in daily stand-up meetings as part of the **Agile** methodology to foster a collaborative environment, ensuring seamless communication and swift issue resolution within the development team.
- **Tech Stack:** JavaScript, Typescript, React, Redux, Node, Express, NestJs, MySql, MongoDB, AWS, Git, Jira, HTML, CSS, BitBucket, SNS, SQS, S3, Docker
